

MODEL H600

Minimize your waste of time, space and money

- Up to 90% Compaction
- Pallet-size bales of up to 500 kg.
- Low machine height: 2.17 metres
- Send bales direct to mills for recycling
- Multi-purpose: cardboard, plastic & PET
- Automatic door operation & bale ejection

The Mil-tek H600 Mill Size Baler is a hydraulic mill size baler, that makes extremely dense, recycle-ready bales that can be sent directly to mills for final recycling.

The Mil-tek H600 is one of the most effective hydraulic balers on the market making bales of up to 500kg that fit perfectly on a standard pallet. The extra long piston stroke and large door-opening means bales of cardboard or plastic can be made quickly and easily. The baler is designed to make extremely dense, recycle-ready bales of either cardboard or plastic that can be then sent directly to mills for final recycling.
